MC # 15, s. 1974

MEMORANDUM CIRCULAR

TO : CHIEF, OPERATIONS DEPARTMENT; CHIEF, ENGINEERING DEPARTMENT; REGIONAL IRRIGATION ENGINEERS; OFFICERS-IN-CHARGE OF PROVINCIAL OFFICES; AND ALL OTHERS CONCERNED
This Office

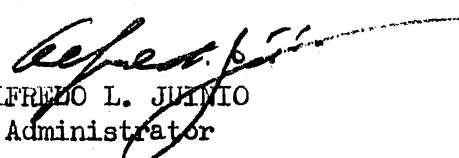

SUBJECT : Relocation of the Well Drilling and Pump Installation Unit

It is hereby informed that a review of the activities being undertaken in the well drilling and pump installation units reveal that the main objective of these activities is the construction of pump irrigation projects wherein the pump and engine set is classified as "installed equipment". It is therefore considered as an integral part of the pump irrigation project.

Because of this fact, it has been decided that the unit undertaking this activity be relocated to the Engineering Department. Corollary to this, all activities in the well drilling and pump installation units in the regions should also be relocated to the Engineering Divisions of the corresponding regional offices.

In view hereof, regional irrigation engineers are hereby directed to transfer the well drilling and pump installation units in their regional offices from the Operations Divisions to the Engineering Divisions so as to align responsibilities of the corresponding officials in the field and the departments in the Central Office. In implementing this instruction it is directed that a report be made to the Administrator (Attention of the Assistant Administrator for Engineering and Operation), of the date when such transfer of responsibility has been effected in each of the regional offices concerned.

Compliance is enjoined.

ALFREDO L. JUNIO
Administrator
