MC # 40, s. 1990

MEMORANDUM CIRCULAR

TO : ASSISTANT ADMINISTRATORS FOR PDI AND SOEM,
REGIONAL IRRIGATION MANAGERS, PROJECT MANAGERS
AND CONCERNED DEPARTMENT MANAGERS

SUBJECT : INVOLVEMENT OF DESIGN ENGINEERS IN FIELD
INSPECTION WORKS FROM PROJECT INCEPTION
TO POST PROJECT COMPLETION

In line with the thrust of the Agency to provide dependable and efficient irrigation services to farmer-end users through the construction of irrigation facilities that are in accordance with the design and specification requirements, the concerned offices are hereby directed to mobilize and make use of their design engineers in conducting regular independent field inspection from project inception to post project completion. Their involvement will keep them abreast and updated of any change, whether minor or major, of the in-situ conditions considering the length of time from inception to completion of the irrigation facilities. Likewise, they will be able to monitor and check the on-going construction as to the compliance with the design requirements such that any defects or faulty works can be remedied/corrected at the right time.

Furthermore, it is also directed that a senior design engineer shall be made ^{an} ~~member~~ of the final inspection team that will be tasked to conduct final inspection of completed contract works in all types of civil works contracts.

It is understood, however, that in order to carry out effectively such inspection works and produce the desired output expected of them, the design engineers shall be required to render inspection reports for management information, consumption and appropriate action in ensuring that the irrigation facilities after completion will be operational, functional and are in accordance with the design and specification requirements.

This order takes effect immediately.

Be guided accordingly.
